Question: 4 of 60 Time Remaining: 01:14:18
Pause Remaining: 00:05:00

A nurse in a provider's office is assisting in the care of a client.

0900:

Client is being seen in the office. Client reports feeling fatigued and having a heavy menstrual cycle the past year. Upon data collection, the client's conjunctiva and mucosal membranes are pale. Provider notified and labs to be drawn.

2 days later:

Provider reviewed laboratory results and wrote prescription.

The nurse notifies the client and reinforces teaching about the newly prescribed medication. For each of the following client statements, click to specify whether the statement indicates an understanding or no understanding of the teaching.

Client Statement	Understanding	No Understanding
"If I experience black stools, I should notify my provider."	<input type="radio"/>	<input type="radio"/>
"I should rinse my mouth after taking this medication."	<input type="radio"/>	<input type="radio"/>
"I should avoid taking antacids while on this medication."	<input type="radio"/>	<input type="radio"/>
"I should take this medication with orange juice."	<input type="radio"/>	<input type="radio"/>
"I should take my medication on an empty stomach."	<input type="radio"/>	<input type="radio"/>
