

NURX104 Essentials of Nursing Care: Health Safety WITH ACTUAL QUESTIONS AND CORRECT VERIFIED ANSWERS ALREADY GRADED A+ 100% GUARANTEED PASS!

Nursing process, Documentation, Reporting

During the implementation of a patient care plan, an RN needs to consider which of the following actions?

(Select all that apply.)

Directing care to other personnel

Providing appropriate patient teaching as needed

Providing direct patient care according to the plan

Focusing on traditional health care practices

Implementing the plan in a safe, timely fashion with the patient only_
{ANSWER}->*1) Implementation of the care plan involves directing the
care of other personnel.

*2) Patient teaching is a component of care plan implementation.

*3) The RN is responsible for direct care of the patient during implementation.

4) The RN incorporates traditional and complementary health practices as appropriate.

5) The RN partners with the family, significant others, and caregivers as well as with the patient.

Nursing process, Documentation, Reporting

According to the ANA Standards of Practice, in which phase of the nursing process does the RN determine patient-centered goals and the ways to achieve them?

Analysis

Assessment

Evaluation

Planning-{ANSWER}->1) Analysis is synthesizing data to identify the patient's actual or potential health problems (nursing diagnosis).

2) Assessment is gathering and organizing data in relation to the patient's health status.

3) Evaluation is assessing the patient's response to nursing care, including progress toward the expected outcome (patient-centered goal).

*4) Planning is determining the expected outcomes (patient-centered goals) and formulating specific strategies to achieve the expected outcomes.

Nursing process, Documentation, Reporting

The ANA Standards of Practice state that the evaluation phase of the nursing process involves which nursing activity?

Asking patients for feedback about their hospital stay

Determining achievement of expected outcomes

Documenting care given to the patient

Supervising NAP activities-{ANSWER}->1) Asking the patient for feedback is not an application of the nursing process.

*2) Evaluation is assessing the patient's response to nursing care, including progress toward the expected outcome (patient-centered goal).

3) Documenting care is an ongoing task of the assessment phase of the nursing process.

4) Assigning and supervising patient care to other members of the health care team is part of the planning phase.

Nursing process, Documentation, Reporting

Posting pictures or descriptions of patient information on social media represents a significant risk to the RN because of which legal violation?

Federal privacy laws

Personal privacy laws

Nursing ethics

Standards of practice-{ANSWER}->*1) Federal privacy laws are violated under the Health Insurance Portability and Accountability Act.

2) See 1).

3) See 1).

4) See 1).
